SECURE, RELIABLE, RESILIENCE

Cloud Europe was born to deal with the new industrial devolution. The Company is based in Rome, in a modern high-tech area. It produces, hosts and manages data center and webfarm infrastructure. The our goal is to provide an innovative service with the highest standards of safety, security and quality. Cloud Europe caters to companies operating in the financial and insurance world and to all those companies with a strategic policy management in the business continuity.

CLOUD EUROPE – FUTURE IN ENGINEERING
The business continuity solution for your Assets
The new social-political context sees growing request for services about high-level business models but also for common use related to widespread personal devices; these models are related to banking, financial, management, insurance and manufacturing.
This new brand "Cloud Europe" combines reliability and security in the protection and processing of own data and records.
Teamworking (between Cloud Europe, his customers and his suppliers), innovation, and identification of the most suitable solution are the added values of Cloud Europe, that combines all different strengths and different specializations in engineering fields.
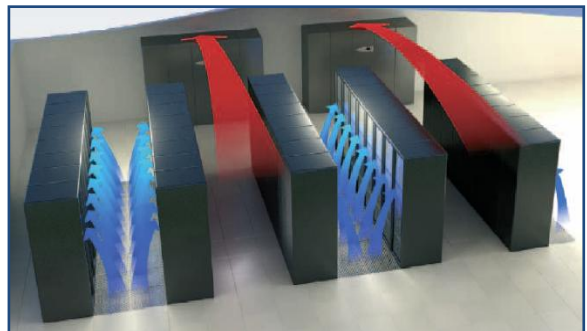

Data Center Service
BUSINESS CONTINUITY and DISASTER RECOVERY
The security of your data and records
Cloud Europe Mission is to design data center and web farm solutions that guarantee efficiency of 99,995% minimum over every single year. It uses the integration with own innovative and engineered system to meet current and future needs of Society.
Major investments in infrastructure, attention in choosing supplier and careful management of the offered services make of **Cloud Europe a qualified and professional reference** in data center and innovation field. Cloud Europe is able to propose an **integrated offer of solutions and services, a complete, effective and efficient offer**.
Through the unified and correlated dialogue between complex and heterogeneous systems, Cloud Europe offers a **careful and timely management**, so It guarantees high performance, thus avoiding inefficiencies that can lead to problems of loss of important and sensitive data.

Cloud Europe Skills and Solutions
Skill, Asset e Solutions

SKILLS
- Security Manager
- Experts in operational policies
- Systems design
- Engineering supply
- Skilled technicians in installation and maintenance
- Systems engineers

ASSET
- Control Room (H24)
- Disaster Recovery Center
- Software House with system engineers with customer solutions

SOLUTIONS
- Housing in Rating 3 or 4 (ANSI TIA 942)
- Hosting
- Structured cabling
- Technical services H24
- Hardware installation
- Software installation
- Hardware maintenance
- Manutenzione maintenance
- Tests
- Monitoring
- Quality plan
- Energy efficiency
- Documentation (preparation and management)
- Added values of Cloud Europe
  - ✓ Project manager
  - ✓ Organisational committee
  - ✓ Techincal committee
